ONTOGRAPHY
VERSUS
EPISTEMOLOGY

Ontology is concerned with what is true or real, and the nature of reality

Epistemology is concerned with the nature of knowledge and different methods of gaining knowledge

Asks questions like “What is existence?” and “What is the nature of existence?”

Asks questions like “What do you know?” and “How do you know it?”

</table>
| Positivism             | There is only one single truth | Reality can be measured and there are reliable and valid tools to do this | – Positivism  
– Post-positivism | – Experimental research  
– Survey design | Usually **quantitative**, may include  
– Sampling  
– Measurement & scaling  
– Statistical analysis  
– Focus group interviews |
| Constructivism/Interpretivism | There is no single reality or truth. Reality is created by individuals in groups | Therefore, reality needs to be interpreted, in order to uncover the underlying meaning of events, activities and behaviours | – Interpretivism  
– Phenomenology  
– Symbolic interactionism  
– Hermeneutics  
– Critical inquiry  
– Feminism | – Ethnography  
– Grounded theory  
– Phenomenological research  
– Heuristic inquiry  
– Action research  
– Discourse analysis  
– Feminist standpoint, etc | Usually **qualitative**, may include  
– Interviews  
– Observation (researcher as participant/non-participant)  
– Case Study  
– Life History  
– Narrative  
– Theme Identification |
| Pragmatism             | Reality is constantly renegotiated, debated, re-interpreted in light of its usefulness in new situations | The best method is one that solves the problem. Finding out is the means, with change the underlying goal | – Deweyan pragmatism  
– Research through design | – Mixed methods  
– Design-based research  
– Action research | Combination of any of the above, as well as data mining, usability testing, physical prototypes |
| Subjectivism           | Reality is we perceive to be real | All knowledge is purely a matter of perspective | – Postmodernism  
– Structuralism  
– Post-structuralism | – Discourse theory  
– Archaeology  
– Anthropology  
– Genealogy  
– Deconstruction | – Auto-ethnography  
– Semiotics  
– Literary analysis  
– Pastiche  
– Intertextuality, etc |
| Critical Realism       | Realities (plural) are socially constructed, under constant internal influence | Reality and knowledge are both socially constructed by power relations within society | – Marxism  
– Queer Theory  
– Feminism  
– *Kaupapa Māori* | – Critical discourse analysis  
– Critical ethnography  
– Action research  
– Ideology critique | – Ideological review  
– Civil actions  
– Open-ended interviews/questionnaires/observations, etc  
– Journals |
