# About this report

PRI reporting is the largest global reporting project on responsible investment.

It was developed with investors, for investors. PRI signatories are required to report publicly on their responsible investment activities each year. In turn, they receive a number of outputs, including a public and private Transparency Report.

The public Transparency Reports, which are produced using signatories' reported information, provide accountability and support signatories to have internal discussions about their practices and to discuss these with their clients, beneficiaries, and other stakeholders. This public Transparency Report is an export of the signatory's responses to the PRI Reporting Framework during the 2025 reporting period. It includes the signatory's responses to core indicators, as well as responses to plus indicators that the signatory has agreed to make public.

In response to signatory feedback, the PRI has not summarised signatories' responses – the information in this document is presented exactly as it was reported.

For each of the indicators in this document, all options selected by the signatory are presented, including links and qualitative responses. In some indicators, all applicable options are included for additional context.

## Disclaimers

### Legal Context

PRI recognises that the laws and regulations to which signatories are subject differ by jurisdiction. We do not seek or require any signatory to take an action that is not in compliance with applicable laws. All signatory responses should therefore be understood to be subject to and informed by the legal and regulatory context in which the signatory operates.

### Responsible investment definitions

Within the PRI Reporting Framework Glossary, we provide definitions for key terms to guide reporting on responsible investment practices in the Reporting Framework. These definitions may differ from those used or proposed by other authorities and regulatory bodies due to evolving industry perspectives and changing legislative landscapes. Users of this report should be aware of these variations, as they may impact interpretations of the information provided.

### Data accuracy

This document presents information reported directly by signatories in the 2025 reporting cycle. This information has not been audited by the PRI or any other party acting on its behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented.

The PRI has taken reasonable action to ensure that data submitted by signatories in the reporting tool is reflected in their official PRI reports accurately. However, it is possible that small data inaccuracies and/or gaps remain, and the PRI shall not be responsible or liable for such inaccuracies and gaps.

#### Section 1. Our commitment

- Why does your organisation engage in responsible investment?
- What is your organisation's overall approach to responsible investment, and what major responsible investment commitment(s) have you made?

The Victoria University of Wellington Foundation is an independent organisation that raises and manages donations for the benefit of Victoria University of Wellington. It is led by a volunteer board, and staff are employed by the University's Development and Alumni Relations Office. The Board's Finance Risk & Investment Committee works with the Foundation's Board of Trustees to assure the quality and integrity of the financial management of the Foundation, including monitoring compliance with its Statement of Investment Policy and Objectives and monitoring the investment performance of the Fund and its investment managers. The Trustees believe engaging in responsible investment is in the best interests of the University, its students, stakeholders and donors. As our investment horizon is very long term, the Trustees believe taking a sustainable investment view is more likely to create and preserve investment capital and that considering environmental, social and governance factors improve long-term returns. The Trustees recognise that investment in pooled funds is the most efficient way to implement their investment strategy, however acknowledge they will not be able to control investment decisions with regard to specific companies.

The Trustees address this by investigating the policies and performance of firms when Investment Managers are selected and appointed to identify strategies which best align with the beliefs and values of the Foundation, and through subsequent oversight and periodic engagement with the Investment Managers. Managers with strong sustainability characteristics are preferred and the Foundation's assets are placed with those managers who practice the six Principles for Responsible Investment (PRI). The Trustees have an objective to avoid investing in industries or organisations whose purpose does not meet generally accepted ethical environmental, social and governance standards, or that do not align with the values and objectives of the University. The Trustees agree that company engagement is a means to effect desired changes in corporate behaviour. The values, beliefs and expectations of the Foundation, with respect to ESG factors, are communicated to the Foundation's underlying Investment Managers through the selection and monitoring process, which include direct engagement with Investment Managers on a regular basis.

#### Section 2. Annual overview

- Discuss your organisation's progress during the reporting year on the responsible investment issue you consider most relevant or material to your organisation or its assets.
- Reflect on your performance with respect to your organisation's responsible investment objectives and targets during the reporting year. Details might include, for example, outlining your single most important achievement or describing your general progress on topics such as the following (where applicable):
  - refinement of ESG analysis and incorporation
  - stewardship activities with investees and/or with policymakers
  - collaborative engagements
  - attainment of responsible investment certifications and/or awards

The Foundation undertook a review of its approach to Responsible Investment while reviewing our Statement of Investment Policy and Objective in 2023 and in the 2024 reporting period an amended SIPO was implemented. The review of the investment portfolio resulted in the appointment of several new asset managers. The Foundation made responsible investment a key part of the selection process. It investigated the records and policies of investment managers during selection and appointment, reviewed Mercer ESG ratings, considered if each asset manager was a PRI signatory and set up monitoring and engagement expectations with all investment managers and our investment consultant (Mercer). The process resulted in the appointment of a manager panel with improved Mercer ESG ratings and a greater commitment to responsible investment. All the Foundation's managers are now themselves signatories to the UNPRI. The Foundation continues to receive in-depth reporting from investment consultant (Mercer) to monitor ESG ratings, weighted average carbon intensity (WACI) for relevant funds, and receive an annual statement of compliance from all investment managers. The Foundation meets with its underlying managers on an annual cycle, where the Foundation expectations with respect to ESG factors is made clear.

### Section 3. Next steps

- What specific steps has your organisation outlined to advance your commitment to responsible investment in the next two years?

Our Statement of Investment Policy and Objectives is subject to formal review every three years with an annual health check performed at least every 12 months in between formal reviews. We are committed to continuous monitoring through quarterly reporting and calling all fund managers to an annual review meeting, where ESG expectations are made clear. Given the Foundation's scale, investment via pooled vehicles is the most appropriate method of implementing its investment strategy. The inherent trade-off is the lack of control over the investment decision making process at the individual security level. In order to address this, ESG factors are actively considered in the manager selection process in order to best align the Foundation's values and beliefs with the manager selected.

The Foundation is committed to responsible investment practices and manages its assets in accordance with our Statement of Investment Policy and Objectives (SIPO). As part of our commitment, we ensure that the responsible investment policies of the specialist fund managers we engage address a wide range of environmental, social, and governance (ESG) considerations. All of our fund managers are signatories to the UN Principles for Responsible Investment (UNPRI). You will find information related to the above elements in our SIPO and our fund managers' policies, which are publicly available on the Foundation's website.
