“

Through the Master of Renewable Energy programme, I'm able to connect with brilliant individuals from various countries and learn first hand about their energy generation schemes. A major highlight is gaining exposure to how Aotearoa New Zealand successfully enables renewable energy in its generation mix, with insights provided by our professors and guest lecturers who are experts in the field.

Jemel Louis Dela Rama (Philippines)
Student, Master of Renewable Energy

If the degree or major you wish to study does not appear in this list, you can still apply. You will need to justify how your preferred programme might align to a recommended study subject for your country. A one-year postgraduate diploma may be available for some subjects as a pathway to completing a Master's degree.

“

New Zealand has long been a dream destination for me, and the Manaaki scholarship presented an ideal opportunity to explore this country. As a recipient of the Manaaki scholarship, I've found it to be a game-changer. The financial support wasn't just about making ends meet but also gave me the freedom to dive deep into my passion for public policy. In a nutshell, Manaaki isn't just a scholarship; it's a whole experience.

Wai Lwin Thaw (Myanmar)
Graduate, Master of Public Policy
