

School of Information Management

BBIS 417
ENTERPRISE SYSTEMS

Trimester Two 2011

COURSE OUTLINE

Names and Contact Details

Course Coordinator	Jean-Grégoire Bernard
Room	Room 409, Rutherford House, Pipitea Campus
Phone	4 463-9742
Email	jean-gregoire.bernard@vuw.ac.nz
Office Hours	meetings by appointment

Course Administrator	Kim Hann
Room	Room 521, Rutherford House, Pipitea Campus
Phone	4 463 5457
Email	kim.hann@vuw.ac.nz

Trimester Dates

Teaching Period: Monday 11th July – Friday 14th October 2011

Study Period: Monday 17th October – Thursday 20th October 2011

Examination Period: Friday 21st October – Saturday 12th November 2011 (inclusive)

Class Times and Room Numbers

Tuesdays 9:30 – 11:20 in Railway West Wing (RWW) 125

Course Content

This course focuses on the theory and practice of implementing and utilising enterprise-wide application systems in organizations. Few organizations attempt to build information systems on their own and many rely upon the marketplace to fulfil their information systems needs nowadays. Such a shift to the marketplace require novel skills on the behalf of IS professionals to evaluate and to manage vendors. Furthermore, the adoption of enterprise systems is usually done in the context of a larger organizational improvement and change initiative. Their adoption involves explicit redesign of IT architecture, business processes and other organizational structures (i.e. job design, compensation, reporting relationships). It is not surprising to observe costs overruns, schedule delays, and unfulfilled expectations following enterprise systems

implementation projects. The adoption of enterprise systems is thus a venture fraught not only with significant potential rewards but also considerable risks. This course will provide you the skills and knowledge required to face the challenges related to the adoption and implementation of enterprise systems.

Course Learning Objectives

By the end of the course, students should be able to (week # in parenthesis):

1. Describe and understand the function of enterprise systems in organizations (1).
2. Describe and understand the positioning strategies, product development practices, platform strategies, and distribution strategies of enterprise systems vendors (2, 3, 4, 5, 6).
3. Evaluate and analyse the rationale for enterprise systems as a component of an organization's IT architecture (7).
4. Evaluate and analyse the technical and organizational challenges of implementing enterprise systems (8).
5. Understand and appreciate the application of enterprise systems to support supply chain management (9, 10).
6. Understand and appreciate the development of analytical capabilities from enterprise systems (11).
7. Identify key current trends that shape the enterprise systems marketplace (12).

The course objectives include the Faculty learning objectives which are the development of critical and creative thinking, leadership, effective oral and written academic communication, and a global and multicultural perspective. Selected Faculty learning objectives will be assessed along with the following specific outcomes based on the statutory statement of course learning objectives above.

Course Schedule and Readings

Please note that slight variations might be made to this schedule as the trimester progress. Changes will be communicated in class if necessary. There is no textbook for this course. I expect you to read the required readings before each class and to have done the informal exercises if any were assigned for the class. Extra readings to be discussed in class may be assigned and communicated in class during the trimester. All course readings will be made available via the 'Blackboard' system. Supplementary readings, videos and podcasts will also be provided on 'Blackboard' for your own curiosity.

<i>Class</i>	<i>Topic</i>	<i>Required readings and preparation</i>
Week 1 12/7	Introduction – Understanding the integrated enterprise	<ul style="list-style-type: none"> – Wailgum, T. (2008). Why ERP systems are more important than ever. <i>CIO Magazine</i>. http://www.cio.com/article/print/177300 – Mathrani, S., Viehland, D., Rashid, M.A. (2007). Enterprise systems implementations in New Zealand: A practitioners' perspective. <i>PACIS 2007 Proceedings</i>.

Week 2 19/7	Enterprise systems as products (part 1): – Market positioning in the enterprise software business	<ul style="list-style-type: none"> – Cusumano, M. (2008). The changing software business: Moving from products to services. <i>IEEE Software</i>, 41(1), 20-27. – Cusumano, M. (2003). Beware the lure of the horizontal. <i>Communications of the ACM</i>, 46(7), 15-17. – Cusumano, M. (2007). The changing labyrinth of software pricing. <i>Communications of the ACM</i>, 50(7), 19-22.
Week 3 26/7	Enterprise systems as products (part 2): – The development life cycle of an enterprise system	<ul style="list-style-type: none"> – Case study to be distributed in class (on week 2). – Sawyer, S. (2001). A market-based perspective on information systems development. <i>Communications of the ACM</i>, 44(11), 97-102.
Week 4 1/8	Enterprise systems as products (part 3): – Platform strategy and network effects	<ul style="list-style-type: none"> – Farhoomand, A. (2007). Opening up of the software industry: The case of SAP. <i>Communications of the Association for Information Systems</i>, 20, 800-811. – Eisenmann, T.R. (2008). Managing proprietary and shared platforms. <i>California Management Review</i>, 50(4), 31-53.
Week 5 9/8	Enterprise systems as products (part 4): – Distribution & service providers – Analysts relations	<ul style="list-style-type: none"> – Swanson, E. B. (2010). Consultancies and capabilities in innovating with IT. <i>Journal of Strategic Information Systems</i>, 19(1), 17-27. – Cusumano, M. (2003). Company character and the software business. <i>Communications of the ACM</i>, 46(10), 21-23. – Violino, B. (1999). The knowledge merchants. <i>InformationWeek</i>, 761, 46-76.
Week 6 16/8	Class presentations of vendor reports.	– No required readings.
Week 7 6/9	Enterprise systems & strategy – The alignment of enterprise systems with IT architecture	<ul style="list-style-type: none"> – Ross, J.W. (2006). <i>Enterprise Architecture: Driving Business Benefits from IT</i>. CISR Working Paper No. 359 and MIT Sloan Working Paper No. 4616-06. – Wybo, M., Bernier, C. (2008). IT Governance at Oxford Industries: Information Architecture for Financial Data. <i>International Journal of Case Studies in Management</i>, 6(1), 1-14.

<p>Week 8 13/9</p>	<p>The implementation of enterprise systems</p> <ul style="list-style-type: none"> - Software tailoring and configuration - Testing and data conversion - Change management - Training - Rollout 	<ul style="list-style-type: none"> - Markus, M. L., & Tanis, C. (2000). The enterprise systems experience-from adoption to success. In R. W. Zmud (Ed.), <i>Framing the domains of it research: Glimpsing the future through the past</i> (pp. 173-207). Cincinnati, OH: Pinnaflex Educational Resources, Inc. - Brown, C.V., Vessey, I. (2000). <i>Nibco's Big Bang</i>. Proceedings of the International Conference on Information Systems (ICIS 2000). pp.1-29. - (Optional) Brehm, L., Heinzl, A., & Markus, M. L. (2001). <i>Tailoring ERP systems: A spectrum of choices and their implications</i>. Proceedings of the 34th Hawaii International Conference on Systems Sciences (HICSS 2001). pp.1-9. - Mathrani, S., Viehland, D., Rashid, M.A. (2007) – <i>from week 1 - revisited</i>.
<p>Week 9 20/9</p>	<p>The application of enterprise systems to supply chain management (part 1)</p> <ul style="list-style-type: none"> - Supply chain simulation 	<ul style="list-style-type: none"> - Davenport, T.H. (2004). Enterprise systems and the supply chain. <i>Journal of Enterprise Information Management</i>, 17(1), 8-19.
<p>Week 10 27/9</p>	<p>The application of enterprise systems to supply chain management (part 2)</p> <ul style="list-style-type: none"> - Inter-organizational enterprise systems - Integration with RFID technology 	<ul style="list-style-type: none"> - Lee, H.L., Padmanabhan, V., Whang, S. (1997). The bullwhip effect in supply chains. <i>MIT Sloan Management Review</i>, 38(3), 93-102. - Thiesse, F., Al-Kassab, J., Fleisch, E. (2009). Understanding the value of integrated RFID systems: A case study from apparel retail. <i>European Journal of Information Systems</i>, 18(6), 592-614.
<p>Week 11 4/10</p>	<p>Developing an analytical capability from an ES</p> <ul style="list-style-type: none"> - Reporting - Data warehousing - Business intelligence 	<ul style="list-style-type: none"> - Davenport, T.H., Harris, J.G. (2007). The architecture of business intelligence. In <i>Competing on analytics: The new science of winning</i> (pp.153-173). Harvard Business School Press. - Moody, D.L., Kortink, M.A.R. (2003). From ER models to dimensional models: Bridging the gap between OLTP and OLAP design, part I. <i>Business Intelligence Journal</i>, 8(3), 7-24. - Bashein, B.J., Markus, M.L. (2000). Lessons learned and recommendations. In <i>Data warehouses: More than just mining</i> (pp. 107-139). Financial Executive Research Foundation.

Week 12 11/10	The future of enterprise systems – Challenges faced by adopters and “mega-vendors” due to cloud computing & SaaS architectures	<ul style="list-style-type: none"> – Case study to be distributed in class (on week 11). – Ambrust, M., et al. (2010). A view of cloud computing. <i>Communications of the ACM</i>, 53(4), 50-58. <p style="text-align: center;">Individual assignment (case study analysis) due before 3pm, Thursday, October 20th.</p>
------------------	---	---

Course Delivery

A series of lectures will act as the foundation for the course. However, in an attempt to provide a more interactive learning environment, you will be frequently involved in class exercises, discussions, and presentations. These class exercises and presentations will not contribute to course grades (except when specified otherwise). These activities will foster deeper involvement and understanding of the themes and concepts addressed in the lectures.

Expected Workload

This is a 15 point course. One point should equate to 10 hours of work, which means a total of 150 hours for a 15-point course. You are expected to attend all course sessions, read assigned materials, and contribute to discussions. You are expected to spend 2 hours in class and about 6 hours preparing for class on average. Additional time will be required for completion of the course assignments.

Group Work

All group work will occur in class. Five (5) team quizzes, worth 2% each, will take place during the trimester as part of the readiness assurance process for this course. Further details about the team quizzes are found in the *Assessment Requirements* section of this outlines. Any other group work which will occur in class will not contribute to the course grade.

Materials and Equipment

You will make extensive use of the University Library print and electronic resources to elaborate your vendor report and case study analysis. As a starting point, among the relevant resources we find:

- SEC Edgar
- Proquest
- LexisNexis
- Factiva
- Business Source Complete
- RDS Business Suite
- Index New Zealand
- NewztextPlus
- Analysts web sites: Gartner, Forrester, Ovum, IDC.
- On the internet: CIO Magazine, ComputerWorld, InformationWeek, Baseline, Google Finance, and enterprise systems vendors’ websites are good starters, but there are many others.

Assessment Requirements		Due date
5 Quizzes – Individual (3% each)	15%	5 lectures chosen randomly between w2 and w12.
5 Quizzes – Team (2% each)	10%	5 lectures chosen randomly between w2 and w12.
Class presentation of vendor report	20%	August 16.
Assignment: Case study analysis	25%	October 20 th , before 5pm.
End of term examination	<u>30%</u>	Between October 21 & November 12.
Total	100%	

Readiness Assurance Process Quizzes (individual and team)

There will be 5 *random* quizzes during the trimester (week 2 to 12, except week 6). The quizzes will consist of 8 or less multiple-choice questions that will assess whether you have a sound understanding of the key concepts from the required readings for that week. The questions will focus on foundational concepts, not picky details, and are meant to assess your readiness to discuss the week's topic. The quizzes will be completed in a two steps fashion. At the beginning of the class, the quizzes are completed individually. Once the individual quizzes are completed, you will retake the same quizzes, but this time as a team of 3 students and the team must reach agreement on the answers to each quiz question. The teams will be formed on a random basis at the beginning of each quiz sessions. The individual quizzes are worth 3% each and the team quizzes are worth 2% each. If you are absent without appropriate justification when the readiness assurance process takes place (e.g. official medical note sent to the lecturer before the beginning of class), you will obtain a mark of 0 for both the individual and the team quizzes in that given week.

Individual assignment #1: Class presentation of a vendor report

This assignment requires you to present to the class a description, synthesis, and analysis of a specific enterprise systems vendor product offerings. The 10 minutes presentation should address a detailed analysis of the vendor's history, product positioning strategy, product development strategy, platform strategy, and distribution strategy and service partners. Each student will work on a different vendor; the vendors will be allocated on the second day of class (July 19). Further instructions on how to prepare your presentation as well as a detailed marking grid will also be communicated on the second day of class (July 19).

Individual assignment #2: Case study analysis

For this case study, you assume the role of an expert consultant on enterprise systems. The analysis should identify the key issues and challenges faced by managers of an organization facing significant challenges in adopting and implementing an enterprise systems solution. The written report of the case analysis should be of no more than 3000 words, but no less than 2000 words (excluding figures and tables). Specific questions will guide your analysis of the cases. Further instructions on how to elaborate the case study analysis as well as a detailed marking grid will be communicated in class on September 6th. An electronic copy of the case analysis is due on October 20th before 3pm, by email.

End of term examination

The examination is closed book 3-hour examination and no computers or electronic calculators will be allowed in the examination room. Both short and long essay style answers are expected. The topics covered in the examination include the required (not supplementary) readings and materials that will be distributed in class for all 12 weeks. Exceptions to the material examinable will be communicated explicitly through Blackboard and email if necessary. Further details regarding the examination will be communicated in class closer to the date. Students are

obligated to be present at university until the end of the examination period. The final examination for this course will be scheduled at some time during the period **Friday 21st October – Saturday 12th November 2011 (inclusive)**.

Mandatory Course Requirements

An attendance register will be kept, however there will be no penalty for non-attendance. To pass the course, you must gain a weighted average of 50% across all assessments.

Grading Standards

Letter Grade	Number grade	Approx Dist'n *	Simple Description	More Complete Description**
A+	Over 84	4%	Outstanding	Far exceeds requirements, flawless, creative
A	80-84	10%	Excellent	Polished, original, demonstrating mastery
A-	75-79	14%	Very Good	Some originality, exceeds all requirements
B+	70-74	22%	Good	Exceeds requirements in some respects
B	65-69	26%	Satisfactory	Fulfils requirements in general
B-	60-64	18%	Acceptable	Only minor flaws. Unoriginal
C+	55-59	4%	Pass	Mistakes, recapitulation of course material
C	50-54	2%	Minimum pass	Serious mistakes or deficiencies
D	40-49	1%	Unacceptable	Little understanding, poor performance
E	00-39	1%	Fail	Below the minimum required

* This is the hypothetical percentage of students that would attain the various levels of performance, over several repetitions of the course, under similar conditions. It is recognised that the distribution in a particular course, particularly with small enrolment, may differ markedly from the long-term distribution. To obtain a fair distribution of marks relative to assignment difficulty, scaling of marks may be employed on some or all assessments.

** The lecturer will develop a more complete or specific description of the meaning of the various levels of performance based upon the specific nature of the assessment in a course. For example, performance may be determined by the qualities of a written report, a classroom presentation, or an examination. The words used to describe these kinds of assessments will obviously vary.

Note

Your assessed work may also be used for quality assurance purposes, such as to assess the level of achievement of learning objectives as required for accreditation and audit purposes. The findings may be used to inform changes aimed at improving the quality of FCA programmes. All material used for such processes will be treated as confidential, and the outcome will not affect your grade for the course.

Penalties

Assignments submitted after the due date and time will not be accepted and students will not receive any marks. Unusual or unforeseeable circumstances (e.g. serious illness, family bereavement) may lead to a waiver of this penalty but need to be discussed with the Course Coordinator as soon as possible. If a word limit is imposed, the examiner will only mark the assignment up to the word limit.

Class Representative

A class representative will be elected in the first class, and that person's name and contact details will be available to VUWSA, the Course Coordinator and the class. The class representative provides a communication channel to liaise with the Course Coordinator on behalf of students.

Communication of Additional Information

Additional information or changes will be conveyed by means of in-class announcements and e-mail. Please ensure that you check these communication channels regularly.

Use of Turnitin

Student work provided for assessment in this course may be checked for academic integrity by the electronic search engine <http://www.turnitin.com>. Turnitin is an on-line plagiarism prevention tool which compares submitted work with a very large database of existing material. At the discretion of the Head of School, handwritten work may be copy-typed by the School and subject to checking by Turnitin. Turnitin will retain a copy of submitted materials on behalf of the University for detection of future plagiarism, but access to the full text of submissions will not be made available to any other party.

Withdrawal from Courses:

Your fees will be refunded if you withdraw from this course on or before **22 July 2011**

The last date for withdrawal from this course is the three-quarter point of the teaching period, i.e. **Friday 23 September**. After this date, students forced to withdraw by circumstances beyond their control must apply for permission on an 'Application for Associate Dean's Permission to Withdraw Late' including supporting documentation. The application form is available from either of the Faculty's Student Customer Service Desks.
