# **COURSE OUTLINE**

### COURSE COORDINATOR and LECTURER

#### Professor Lawrence Corbett

Room:RH901, Rutherford HousePhone:463 5138Email:lawrence.corbett@vuw.ac.nzWebsite:www.vuw.ac.nz/vms

### ADMINISTRATOR

#### Luisa Acheson

Room: RH1022, Rutherford House Phone: 463 5381 Email: luisa.acheson@vuw.ac.nz

### UNDERGRADUATE PROGRAM MANAGER

Garry Tansley				
Room:	RH 915, (Wed, Thur)			
Phone:	463 6968			
Email:	garry.tansley@vuw.ac.nz			

# TUTOR

Deane Nicholls Email: father.panda@gmail.com

# **Trimester Dates**

Teaching Period: Monday 11 July – Friday 14 October Study Period: Monday 17 October – Thursday 20 October Examination Period: Friday 21 October – Saturday 12 November (inclusive)

# Withdrawal from Course

- 1. Your fees will be refunded if you withdraw from this course on or before 22 July 2011.
- 2. The standard last date for withdrawal from this course is Friday September 23. After this date, students forced to withdraw by circumstances beyond their control must apply for permission on an '*Application for Associate Dean's Permission to Withdraw Late*' including supporting documentation

The application form is available from either of the Faculty's Student Customer Service Desks.

# **Class Times and Room Numbers**

Lectures

RWW221	10:30	11:20
RWW126	16:40	17:30

### **Tutorial Signup Instructions**

Tutorial signup is done through the online programme, 'S-Cube'. You should already have been notified by email about your sign-up to a tutorial:

- Go to the signup website at <u>https://signups.victoria.ac.nz</u> and enter your SCS username and password to log into the system.
- Click on MGMT314 and follow the instructions.
- If you have been unable to sign up by the end of the second week of the course please contact <u>Garry.Tansley@vuw.ac.nz</u>

### **Course Content**

The course examines the people, processes, systems and technologies that determine the value added by a firm's primary products and services. It prepares future managers across every sector of the economy – whether in services, manufacturing, profit or non-profit environments – to lead, organise, plan and control a set of resources, in pursuit of identified goals.

An integrated approach is adopted. Core operations management decisions are integrated with other functions, such as marketing and finance, and with longer-term strategy. Students are taken on a seamless journey from the fundamentals of operations management, through to the multiple approaches, the various innovations, challenges and risks, and ultimately to models of sustainability and evaluative tools and techniques.

# **Course Learning Objectives**

By the end of this course, students should be able to:

- 1. Define the fundamental building blocks, models and key decisions in managing operating assets and resources;
- 2. Analyse multiple approaches, including strategic, process and systems, and industry supply chain perspectives on operations management;
- 3. Describe how various innovations, and the concepts and tools associated with quality management and operational excellence deliver competitive advantage
- 4. Evaluate the challenges and opportunities in managing risk, and attaining sustainable operations in different settings
- 5. Develop skills for defining and structuring real world operations management problems.

Performance on each of these objectives is assessed by tutorial participation, projects, and final exam.

# **Course Delivery**

The course will be delivered by lectures (24 hours) based on the course text and recommended readings, and tutorials (7 hours) based on cases, exercises, and students' plans to apply the course text to an actual operation. Students are responsible for finding an operation that they can 'observe' in some depth, and for active participation in lectures and tutorials.

# **Expected Workload**

Students can expect the workload to be approximately 10 hours per week, including both scheduled contact time (lectures, tutorials, workshops) and non-scheduled time, for each of the 12 weeks of lectures. Students can expect 30 hours of work during study breaks, for a total of 150 hours.

# **Group Work**

While the course has a tradition of study group collaboration, there are important elements in the assessment process that are strictly individual. Collaboration on individual assignments is <u>not</u> allowed beyond general discussion as to how one might interpret the nature of the assignment question. Please do not work together to formulate a response and do not loan out your completed assignments. You will be expected and encouraged to work in groups on in-term cases discussed in class and/or tutorials, however project reports must be individual submissions.

# Readings

# The required textbook is Slack, Chambers, and Johnston (2010). *Operations Management*, 6<sup>th</sup> edition, Prentice Hall.

Other *recommended* textbooks and reference books, most available in Library, are:

- 1. Bozarth, C.C., Handfield, R. B. (2008). *Introduction to Operations Management* and Supply Chain Management, 2<sup>nd</sup> edition, Pearson Prentice Hall.
- 2. Jacobs, F. R. & Chase R.B. (2010). *Operations and Supply Management*, 13<sup>th</sup> edition. Boston, MA: Irwin McGraw Hill.
- 3. Gardner, D. (2010). *Operations Management for Business Excellence*, 2<sup>nd</sup> edition, Pearson.
- 4. Meredith, J. R., Shafer, S. M. (2010). *Operations Management for MBAs*, 4<sup>th</sup> edition, Wiley.
- 5. Reid, R. D., Sanders, N. R. (2010). Operations Management, 4th edition, Wiley.
- 6. Russell, B. W., Taylor, R. S. (2009). *Operations Management: Creating Value Along the Supply Chain*, 6<sup>th</sup> edition, Wiley.
- 7. Balle, M. and Balle, F., (2006) *The Gold Mine*, Lean Enterprise Institute (available as e-book from Amazon)
- 8. <u>Learning to see : value stream mapping to create value and eliminate muda</u> / by Mike Rother and John Shook ; foreword by Jim Womack and Dan Jones. Version 1.4 Cambridge, MA : Lean Enterprise Institute, 2009, c1999.

# Materials and Equipment

Laptop computers will not be allowed in the final examination.

# **Assessment Requirements**

Assignment	Title	Weight	Date
1	Project Report 1	30%	Tues 6 <sup>th</sup> Sept 4.00pm
			MZ Box #25
2	Project Report 2	20%	Wed 12 <sup>th</sup> Oct 4.00pm
			MZ Box #25
3	Tutorial Preparation & Participation	10%	Throughout the course
4	Final Examination	40%	21 <sup>st</sup> Oct to 12 <sup>th</sup> Nov
	TOTAL	100%	

Relationship between the assessments and the course learning objectives are as follows:

Learning objective	Schedule	Project Report 1	Project Report 2	Tutorial Participation	Final Examination
1	Weeks 1-3	Х		Х	Х
2	Weeks 4-6	Х		Х	Х
3	Weeks 7-9		Х	Х	Х
4	Weeks 10-12		Х	Х	Х
5	Weeks 1-12	Х	Х	Х	Х

# 1. Project Report 1

Date: Tuesday 6<sup>th</sup> September 4.00pm Marks: 30%

Choose an industry and one organization in that industry, excluding the organizations studied in tutorials. Analyse building blocks and approaches to understanding OM and scope for improvement. Research methods include internet/electronic journal research, personal experience and/or site visits as appropriate, e.g. "attach yourself" to a customer order.

This assignment should be presented as a two-part management report, maximum page length (excluding cover sheet and references) 4 pages, maximum word count 2,000 words:

- Part 1. What are the building blocks of the operation? Define the fundamental building blocks, models and key decisions in managing operating assets and resources. Critically evaluate how value is added. (1,000 words)
- Part 2. Analyse the operation from multiple approaches, including strategic, process and systems, and industry supply chain perspectives, as required. Critically evaluate how value is added, with appropriate measurements of performance. (1,000 words)

The first assignment covers weeks 1-6 of the course.

# 2. Project Report 2

Due:	Wednesday	12 <sup>th</sup> October 4.00 pm	Marks:	20%
------	-----------	----------------------------------	--------	-----

Using the organisation from project 1, analyse how to move forward with OM, improve aspects of their operation, and challenges and opportunities. Research methods include internet/electronic journal research, personal experience and/or site visits as appropriate.

This assignment should be presented as an A3 report, using the template from the lectures.

The second assignment covers weeks 7-12 of the course.

#### 3. Tutorial Participation

Due: See below for schedule Marks: 10%

The mark will be based on your attendance and contribution to tutorial discussions. Details of tutorial assignments are given below. All tutorials focus on the particular aspects of the course text and chapters that will be useful to your success in the course projects.

#### 4. Examination

Date: 21<sup>st</sup> October – 12<sup>th</sup> November Marks: 40%

The examination is worth 40% of the total marks available for this course. It is **closed book** three-hour examination. You will be asked to answer questions that will require you to draw on different theories covered in the course. All book chapters and cases covered during the course are examinable.

### **Quality Assurance Note**

Your assessed work may also be used for quality assurance purposes, such as to assess the level of achievement of learning objectives as required for accreditation and audit purposes. The findings may be used to inform changes aimed at improving the quality of FCA programmes. All material used for such processes will be treated as confidential, and the outcome will not affect your grade for the course.

#### Examinations

Students who enrol in courses with examinations are obliged to attend an examination at the University at any time during the formal examination period.

The final examination for this course will be scheduled at some time during the period from Friday 21 October – Saturday 12 November.

#### Penalties

- (i) In fairness to other students, work submitted after any deadline will incur a penalty for lateness. The penalty is 2 of the marks available (marks available means what the assignment is worth i.e. 20% or 20 marks) for an assignment submitted after the due time on the due date for each part day or day late. (for example if an assignment is out of 20 and the assignment receives 50% then one day late means the mark will be out of 18 and the student will receive 50% of 18). Saturdays, Sundays and public holidays will be included when counting the number of days late. Assignments received more than 7 days after the due date will not be accepted and the student will automatically fail the Mandatory Course Requirements.
- (ii) Course Outlines provide a signal to students of forthcoming workload, dates of submission etc, and thus student study plans should take account of course requirements across all courses. Consequently, workload issues related to other courses and employment will not be accepted as reason for dispensation from

mandatory requirements or waiver of penalties. **Extensions** to submission deadlines for any assigned work will only be granted in **exceptional circumstances.** 

(iii) Students who are unable to comply with any of the mandatory requirements should make a written application for an extension to the due date for submission of assigned work or for waiver of a penalty, in advance, to the Tutorial Coordinator, providing documentary evidence of the reasons of their circumstances.

All such applications must be made **before** the deadline and be accompanied by documentary evidence, eg a medical certificate, or counsellor's report clearly stating the degree of impairment, and the dates the illness or event prevented you from undertaking your academic studies. This can be applied retrospectively.

- (iv) In the event of unusual or unforeseeable circumstances (e.g. serious illness, family bereavement or other exceptional events), that precludes an application in advance, students should make contact with the **Tutorial Coordinator** as soon as possible, and make application for waiver of a penalty as soon as practicable.
- (v) Word limits should be adhered to, especially so when they provide a guide to limiting the student's coverage of a topic. The penalty will be 10% of the grade for an assignment which is 10% over the word limit.

#### **Mandatory Course Requirements**

To meet Mandatory Course Requirements, students are required to:

- a. submit all the assignments within allowable time frame;
- b. attend at least five of the seven tutorials; and
- c. obtain at least 40 per cent (i.e. 16 marks out of 40) of the final examination marks available.

Students who fail to satisfy the mandatory requirements for this course but who obtain 50% or more overall, will be awarded a "K" grade.

Standard fail grades (D or E) will be awarded when the student's overall course mark falls below the minimum pass mark, regardless of whether the mandatory course requirements have been satisfied or not.

Notice of Failure to meet Mandatory Course Requirements will be posted on Blackboard.

#### **Class Representative**

A class representative will be elected in the first class, and that person's name and contact details made available to VUWSA, the Course Coordinator and the class. The class representative provides a communication channel to liaise with the Course Coordinator on behalf of students.

#### **Communication of Additional Information**

Additional information will be communicated via Blackboard announcements page or by email.

#### Use of Turnitin (if applicable)

Student work provided for assessment in this course may be checked for academic integrity by the electronic search engine <u>http://www.turnitin.com</u> Turnitin is an on-line plagiarism prevention tool which compares submitted work with a very large database of existing material. At the discretion of the Head of School, handwritten work may be copy-typed by the School and subject to checking by Turnitin. Turnitin will retain a copy of submitted materials on behalf of the University for detection of future plagiarism, but access to the full text of submissions will not be made available to any other party.
