Course Content

The Victoria Master of Business Administration Programme serves to produce professional managers capable of fulfilling strategic roles within business and government enterprises. Integral to this capability is the application of systematic and organised research methodologies to investigate specific problems or opportunities encountered in the work setting.

This course aims to provide students with applied research methodologies with which practical solutions to real organisational issues can be derived. The scope of this course, being focused on individual student proposals, is open-ended and negotiable. Students need to gain access to an organisational sponsor, identify a relevant issue, and propose an applicable methodology in order for the business research project to proceed.

Course Learning Objectives

By the end of this course, students will:

1. Have an understanding of the major social science research methodologies available for applied business research.
2. Have the experience of defining and addressing real-life problems and opportunities in organisational settings.
3. Have an appreciation for applicable research methods as a means to address organisational issues.

Course Delivery

The course has two parts. Part A is a series of six lectures scheduled for the beginning of Trimester One (see below). Part B is governed by the interaction between the student and the VUW academic staff member.
