Course Learning Objectives

The main objective is to understand how the analysis of financial statements and reports of a range of different organisations can be made, **to assess the strengths, weaknesses and future prospects** of the business. When weaknesses are identified, attention will be given to understanding the **steps that are appropriate to remedy each weakness**. Emphasis will also be placed on acquiring the **skills for making swift analysis** of information, knowing that in the business environment such analysis often needs to be made quickly and in an informal setting.

Associated objectives, that are important to achieving the main objective, will be to understand – how financial statements are constructed (and sometimes manipulated) – to understand the nature of acceptable accounting practice (and to identify “creative” accounting) – and to know how to explain the relationship between accounting information for a business and the market value of the equity instruments (or shares) for that business. [It is important to realise, that if you do not have an outline understanding of accepted accounting practice, you are not in a position to be able to make reliable analysis of the information in the financial statements.]

Course content

The prescription for the course is:

An overview of the analysis and evaluation of corporate performance, financial conditions and future prospects as set out in the corporate entities' published annual reports and financial statements.

A detailed course programme, showing the topics for each class, and the due dates for assignments, is attached at the end of this Course Outline.

Readings

The only required reading for the course is contained in **Student Notes** that will be made available at the beginning of the course, and at further intervals during the course programme.

A text that is easy to read, and may be helpful for reference, but not required reading, is: Mary Buffett & David Clark, *Warren Buffett and the Interpretation of Financial Statements*, Simon & Schuster 2008.

More detailed texts that may be helpful for reference, are:

Penman S, *Financial Statement Analysis and Security Valuation*, McGraw-Hill Irwin, New York, 3rd edition 2006.
