

School of Economics and Finance

QUAN 111
MATHEMATICS FOR ECONOMICS AND FINANCE

Trimester 3 (Jan-Feb), 2015

COURSE OUTLINE

Names and Contact Details

Lecturer/Coordinator: Mohammed Khaled
Email: mohammed.khaled@vuw.ac.nz
Office: RH322
Phone: 463 5787
Office hours: By appointment

Course Administrator: Pinky Shah
Email: pinky.shah@vuw.ac.nz
Office: RH319
Phone: 463 5818

Trimester Dates

Teaching Period: Monday 5 January 2015 – Friday 13 February 2015

Examination Period: Monday 16 February 2015 – Saturday 21 February 2015 (inclusive)

Withdrawal from Course

1. Your fees will be refunded if you withdraw from this course on or before one full week after the first class (i.e. on or before Monday 12 January 2015).
2. The standard last date for withdrawal from this course is 4 February 2015.

After the last date stated in #2, students forced to withdraw by circumstances beyond their control must apply for permission on an '*Application for Associate Dean's Permission to Withdraw Late*' including supporting documentation. The application form is available from either of the Faculty's Student Customer Service Desks.

Class Times and Room Numbers

Lectures: Tuesdays and Thursdays 10.00-11.50, KKLT301

Attending lectures is not compulsory, but learning by attending lectures besides reading the textbook is a vital component of the course. To encourage attendance at lectures, and to develop skills in listening and note taking, complete lecture notes are neither uploaded to the course Blackboard site

nor supplied to students individually. Please organise a classmate to share notes with in case you have to miss a lecture for any reason.

Tutorials

Besides the lectures, a total of four 2-hour tutorials will be offered during the trimester according to the schedule on page 5.

You need to choose a tutorial group during the first week of lectures. You can sign up to a tutorial at this site: <https://signups.victoria.ac.nz>. Tutorial sign-up opens at 8am on Monday 5 January and closes at 2pm on Thursday 8 January.

Attendance at tutorials is not required. However, attending tutorials is important as model answers to tutorials are not uploaded onto Blackboard nor are they supplied to individual students. The purpose of tutorials is to learn by trying to answer the questions on your own, and then actively participating in discussions about those answers in a small group setting.

Course Delivery

This course is delivered by two 2-hour weekly lectures and a total of four 2-hour tutorials during the trimester. Each tutorial is a small-group interactive problem solving session, usually covering the prior lecture material.

Expected Workload

You should expect to spend 4 hours in lecture per week, 8 hours in tutorials during the trimester, and about 20 hours per week reading, studying and completing assignments.

Prescription

Mathematical methods appropriate for study of economics and finance: set theory, functions, calculus of functions of one or several variables, financial mathematics, vectors, matrices and systems of linear equations.

Course Learning Objectives (CLOs)

By the end of the course, students should be able to:

1. Carry out mathematical operations on numbers, sets and functions
2. Calculate rates of change using derivatives of functions
3. Find derivatives of functions of a single variable
4. Apply one-variable differentiation (derivatives, product and quotient rules, chain rule, second-order derivatives) to obtain local and global maxima and minima
5. Integrate a rate of change function to recover the function in levels
6. Employ partial differentiation to maximise or minimise functions of two or more variables
7. Represent variables as vectors and assess their linear dependence
8. Implement data operations using matrices
9. Solve linear equation systems using matrices, their determinants and inverses.

Course Content

A brief outline of the course content (topics or themes to be covered), including an indicative schedule for the order of coverage, is on page 5.

Readings

All students should have a copy of the textbook:

Penelope de Boer and Mohammed Khaled, *Mathematics for Business and Economics*, Pearson Prentice Hall, 2007, 2nd edition.

This book contains detailed notes on all of the topics covered in the course; no other textbook is necessary. The lecture schedule gives references to the textbook. Here are some optional alternative texts you could consult. The books are ordered in increasing levels of advancement.

Ian Jacques, *Mathematics for Economics and Business*, 5th ed., FT-Prentice-Hall, 2006.

Michael Hoy et al., *Mathematics for Economics*, 2nd ed., The MIT Press, 2001

Knut Sydsaeter and Peter Hammond, *Essential Mathematics for Economic Analysis*, 2nd ed., FT-Prentice-Hall, 2006.

Materials and Equipment

You must have a calculator that evaluates powers and logs. Calculators will be essential for the test and final exam, however they must be silent in operation and have their own power sources.

Assessment

Item	Duration	%	Due Date/Test Date	CLOs Covered
Assignment 1	-	-	By 5pm on Tuesday 20 Jan 2015	-
Test 1	50 minutes	20%	9am on Wednesday 21 Jan 2015 in KKL303	1
Assignment 2	-	-	By 5pm on Tuesday 27 Jan 2015	-
Assignment 3	-	-	By 5pm on Tuesday 3 Feb 2015	-
Test 2	50 minutes	20%	9am on Wednesday 4 Feb 2015 in KKL303	1-5
Assignment 4	-	-	By 5pm on Tuesday 10 Feb 2015	-
Exam	2 hours	60%	TBC (See 'Examinations' section)	1-9

Your final grade will be determined either on the basis of:

- (a) 40% two 50-minute tests and 60% 2-hour final exam

OR

- (b) 100% 2-hour final exam (CLO 1-9), whichever is higher.

Tests

If you are not able to sit the tests for any reason, the weight for the missed items may be added to that for the final exam, if we have a form of documentation of why you cannot make the test. This documentation is to be given to the course administrator as soon as possible. We reserve the right to scale results if necessary to preserve comparability with other years.

Assignments

A total of four assignments will also be due (by 5pm on a Tuesday) according to the appended schedule. You should use them as an indicator of your progress and performance. Since aegrotat decisions must be based on internal assessment prior to the final exam, it is important to have this evidence available by completing all assignments and the tests as best as you can, *in case you need to apply for an aegrotat pass*.

Assignments should be placed in the appropriate box (by tutor's name), located on Level 2 of Murphy Building. Do not give them to lecturers or tutors. Assignments will be graded either 0, 1, 2, 3 or 4.

A zero or one grade is given for unsatisfactory work, a two is given for passable work (C), a three for satisfactory work (B) and a four is given for highly satisfactory work (A). It is expected that most students will score at least 2 for each assignment. Since the marks are indicative rather than quantitative, there is no need for a provision for remarking. Marks and answers to the assignments will be posted on Blackboard.

Penalties

Late assignments will not be marked.

Examinations

Students who enrol in courses with examinations are obliged to attend an examination at the University at any time during the formal examination period. The final examination for this course will be scheduled at some time during the following period:

16-21 February 2015

Mandatory Course Requirements

In addition to obtaining an overall course mark of 50 or better, students must sit both tests.

If you cannot sit a test or examination, in the first instance, contact the Course Administrator to discuss the options. In the case that you wish to consider applying for an aegrotat, refer to www.victoria.ac.nz/home/study/exams-and-assessments/aegrotat

Class Representative

A class representative will be elected in the first class, and that person's name and contact details made available to VUWSA, the course coordinator and the class. The class representative provides a communication channel to liaise with the course coordinator on behalf of students.

Communication of Additional Information

Additional information concerning this course will be provided in lectures and posted on Blackboard: <http://blackboard.vuw.ac.nz>. Urgent notices will be circulated by email.

Student feedback

Student feedback on University courses may be found at www.cad.vuw.ac.nz/feedback/feedback_display.php

Link to general information

For general information about course-related matters, go to <http://www.victoria.ac.nz/vbs/studenthelp/general-course-information>

Note to Students

Your assessed work may also be used for quality assurance purposes, such as to assess the level of achievement of learning objectives as required for accreditation and academic audit. The findings may be used to inform changes aimed at improving the quality of VBS programmes. All material used for such processes will be treated as confidential, and the outcome will not affect your grade for the course.

LECTURE SCHEDULE

(Page numbers refer to the text, “Mathematics for Business and Economics” 2nd edn)

Week 1			Pages
Tuesday	L1	Numbers, Number operations, Simplifying expressions, Inequalities, Absolute values, Powers	1-22
Thursday	L2	Fractional powers, Solving equalities and inequalities, Simultaneous equations, Subscripted variables, Sum notation	22-55, 58-62
Week 2			
Tutorial 1			
Tuesday	L3	Product notation, Sets and set operations, Functions and graphs, Inverse functions, Logarithmic and exponential Functions, Composite functions	63-100
Thursday	L4	Derivatives, Differentiation using rules, Further differentiation methods	101-111
Week 3			
Tutorial 2, Assignment 1, Test 1 (Wednesday 21 January, L1-L3 topics)			
Tuesday	L5	Application of derivatives, Elasticity, Higher derivatives	111-115
		Concave functions, Graphs using derivatives, Maxima and Minima	117, 120-126
Thursday	L6	More on maxima and minima, Applications, Integration	128-135 138-164
Week 4			
Assignment 2			
Tuesday	L7	Partial differentiation	165-170
		Total derivatives	170-174
Thursday	L8	Optimizing functions of two variables Constrained optimisation	176-181 181-195
Week 5			
Tutorial 3, Assignment 3, Test 2 (Wednesday 4 February, L4-L6 topics)			
Tuesday	L9	Geometric progressions, Compound interest	196-206
		Discounting, Present values	209-215, 223-230
Thursday	L10	Vectors and vector operations, Inner products Orthogonal vectors, Linear independence	235-238 238-244
Week 6			
Tutorial 4, Assignment 4			
Tuesday	L11	Matrices	244-250
		Determinants	250-257
Thursday	L12	Inverting matrices Solving linear equation systems	257-259 261-267, 275-288
