

School of Accounting and Commercial Law

MMPA 507 STATISTICS

Trimester 1, 2015

COURSE OUTLINE

Names and Contact Details

<i>Course Coordinator & Lecturer</i>	Nathaniel Robson nathaniel.robson@vuw.ac.nz	RH 210	Email is preferred
	Office Hours: Monday 1.00 pm – 4.00 pm (or by appointment)		
<i>Course Administrator</i>	Rebekah Sage rebekah.sage@vuw.ac.nz	RH 728	463 6921
	Office hours: Monday-Friday, 8.30 am – 5.00 pm		

Trimester Dates

Teaching Period: Monday 2nd March – Friday 5th June

Study Period: Monday 8th June – Thursday 11th June

Examination Period: Friday 12th June – Wednesday 1st July (inclusive)

Withdrawal from Course

1. Your fees will be refunded if you withdraw from this course on or before Friday 13th March 2015.
2. The standard last date for withdrawal from this course is Friday 15th May. After this date, students forced to withdraw by circumstances beyond their control must apply for permission on an '*Application for Associate Dean's Permission to Withdraw Late*' including supporting documentation. The application form is available from either of the Faculty's Student Customer Service Desks or [online](#).

Class Times and Room Numbers

Tuesdays: 5.40 – 8.30pm

Venue: RH LT2 (Rutherford House Lecture Theatre 2), Pipitea Campus.

Course Delivery

The course will consist of lectures, two assignments, one test, and a final examination that focuses on solving problems similar to those in the assignments. Assignments are designed to help students master the course material through practice and also to aid in preparation for the test and exam. Formal lecture time will be used to explain all key statistical ideas, as well as providing examples of their application. Part of the scheduled lecture time will be devoted to an informal tutorial style discussion of problems appearing in the assignments, test, and textbook exercises as well as demonstrating the use of Excel. Solutions to the assignments and test will be provided.

Group Work

Collaboration on individual assignments is not allowed beyond general discussion as to the nature of the assignment question. Please do not work together to produce any written work and do not loan out your completed assignments.

Expected Workload

This course is a 15-point course. One point is equated to 10 hours of work, which means a total of 150 hours is expected for this course, spread over the 12 teaching weeks, mid-trimester break, study week and the examination period. This involves attending the lectures and tutorials every week, completing all assignments, and preparations for all exams.

Prescription

Statistical techniques useful in accounting research or practice.

Course Learning Objectives

Students who are successful in this course will be able to:

- (a) Understand the potential for statistical data analyses to contribute towards business management decisions;
- (b) Apply the results of statistical data analyses in business applications, including planning, forecasting, decision-making, controlling, and reporting;
- (c) Describe data using graphs;
- (d) Summarise data using numerical measures;
- (e) Analyse data using a variety of inferential analysis techniques including probability rules, sampling distributions of a mean and a proportion, confidence intervals for a single mean and proportion;
- (f) Describe and analyse data using a variety of bi-variate analysis techniques including correlation and linear regression;
- (g) Demonstrate an understanding of basic data collection methods.

Course Content

This course covers statistical techniques useful in business research or practice. The schedule on the last page of this course outline and indicates the topics we shall be covering, the order of coverage, and the approximate timing. Note that we will be working through the entire Clark & Randal textbook so it is recommended to start reading the text early and remain ahead of the schedule.

The course is divided into three main sections:	Course Learning Objectives Covered:
(i) descriptive statistics (chapters 2-5)	(a)-(d) and (g)
(ii) probability and sampling (chapters 6-8)	(a)-(f)
(iii) inference (chapters 9-13)	(a)-(f)

Readings

The prescribed text for this course is: Clark, M. & Randal, J., *A First Course in Applied Statistics*, 2nd edition, Pearson, 2011, which is available in the library as well as in the Victoria book store (ground floor of Rutherford House at the Pipitea Campus). Since we shall be covering the entire text in this course, it is vital to have convenient access to this text.

Materials and Equipment

The completion of assignments will require the use of Excel. Students will be permitted to use non-programmable calculators or silent programmable calculators with their memories cleared during the test and exam. Any formulae and tables needed for the test or exam will be provided. Lecture slides and solutions to the test and assignments will be posted on Blackboard.

Assessment

The Assessment Handbook will apply to all VUW courses: see

<http://www.victoria.ac.nz/documents/policy/staff-policy/assessment-handbook.pdf>.

Item	Specifications	%	Date	Course Learning Objectives
Assignment 1	Chapters 2-7.	15%	Due: Monday 20 April by 4pm	(a),(b),(c),(d),(g)
Test	50 mins, closed book	15%	Tuesday 5 May at 5.40pm	(a)-(g)
Assignment 2	Chapters 8-12.	15%	Due: Friday 29 May by 4pm	(a)-(g)
Exam	2 hours, closed book	55%	TBA (see 'Examinations' below)	(a)-(g)

- **Assignment 1** is due by **4pm on Monday 20 April**. Portions of the assignment will need to be completed using Excel. Your entire assignment must be submitted by email to nathaniel.robson@vuw.ac.nz. Solutions to Assignment 1 will be provided. **No late submissions will be accepted.**
- **The Test** will be held on **Tuesday 5 May** in class (50 minutes) and will cover all material up to and including week 7: lectures, text readings, and Assignment 1.
- **Assignment 2** is due by **4pm on Friday 29 May**. Portions of the assignment will need to be completed using Excel. Your entire assignment must be submitted by email to nathaniel.robson@vuw.ac.nz. Solutions to Assignment 2 will be provided. **No late submissions will be accepted.**
- **The final Examination** is a 120 minute comprehensive exam focussing on the material covered from weeks 8 to 12. Note however that **all** material covered throughout the course in the lectures, text readings, test and assignments is potentially examinable.
- **A brief quiz** will be conducted at the beginning of each lecture as a review of the previous week's material. While these quizzes carry no weight for assessment, student answers will be collected and retained as evidence of class participation and progress towards learning objectives.

Penalties

- **Assignments**

Assignments must be handed in on or before the due date and time. In fairness to other students, and because solutions to assignments are distributed, any assignment submitted after the deadline will not be marked.

An extension or waiver (with no penalty) will be considered on the grounds of exceptional personal circumstances. Students must complete the 'Assignment Extension/Waiver Application Form' available on Blackboard and submit the form (with the relevant supporting documentation) to the MPA Administrator, preferably before the assignment due date.

Note: The submission of an application does not mean that the extension has been approved. Penalties, as detailed above, will apply if the extension is not granted.

- **Test**

Unjustifiable absence from the test will result in a mark of ‘zero’ for that test and may result in a student not meeting mandatory course requirements.

Students unable to take the scheduled test due to exceptional circumstances, must complete the ‘Consideration of Exceptional Personal Circumstances for Tests Application Form’ available on Blackboard. Submit this form to the MPA Administrator as early as possible, preferably before the test date.

Note: The submission of an application does not mean that the test requirement has been changed or waived. Penalties, as detailed above, will apply if it is not successful.

Exceptional Personal Circumstances include an impairment assessed by Disability Services, illness, bereavement, circumstances involving the health or wellbeing of a relative or close friend, compulsory attendance at court, national or international representative commitments, significant cultural commitments, or activities in which the student is representing the University.

*Note: Not being organised or failing to plan ahead are **not** exceptional circumstances.*

Use of Turnitin

Student work provided for assessment in this course may be checked for academic integrity by the electronic search engine <http://www.turnitin.com>. Turnitin is an on-line plagiarism prevention tool which compares submitted work with a very large database of existing material. At the discretion of the Head of School, handwritten work may be copy-typed by the School and submitted to Turnitin. A copy of submitted materials will be retained on behalf of the University for detection of future plagiarism, but access to the full text of submissions will not be made available to any other party.

Examinations

Students who enrol in courses with examinations are obliged to attend an examination at the University at any time during the formal examination period. The final examination for this course will be scheduled at some time during the following period:

Friday 12th June – Wednesday 1st July (inclusive)

Mandatory Course Requirements

In addition to obtaining an overall course mark of 50% or better, students must:

- obtain a minimum of 40% on each individual piece of assessment

If you cannot complete an assignment or sit a test or examination, refer to
www.victoria.ac.nz/home/study/exams-and-assessments/aegrotat

Class Representative

A class representative will be elected in the first class, and that person’s name and contact details made available to VUWSA, the course coordinator and the class. The class representative provides a communication channel to liaise with the course coordinator on behalf of students.

Communication of Additional Information

Additional information concerning this course will be provided in lectures and posted on Blackboard: <http://blackboard.vuw.ac.nz>. Urgent notices will be circulated by email.

Student feedback

Any feedback is considered and followed up.

Student feedback on University courses may be found at
www.cad.vuw.ac.nz/feedback/feedback_display.php

Link to general information

For general information about course-related matters, go to
<http://www.victoria.ac.nz/vbs/studenthlp/general-course-information>

Note to Students

Your assessed work may also be used for quality assurance purposes, such as to assess the level of achievement of learning objectives as required for accreditation and academic audit. The findings may be used to inform changes aimed at improving the quality of VBS programmes. All material used for such processes will be treated as confidential, and the outcome will not affect your grade for the course.

Course Schedule

Week	Date	Topic	Readings
1	3 Mar	Univariate Descriptive Statistics.	Chapters 2, 3.
2	10 Mar	Bivariate Descriptive Statistics.	Chapter 4.
3	17 Mar	Time Series Descriptive Statistics.	Chapter 5.
4	24 Mar	Probability Foundations Of Sampling.	Chapter 6.
5	31 Mar	The Binomial Distribution And Sampling Distributions.	Chapter 7.
MID-TRIMESTER BREAK (Friday 3 April – Sunday 19 April)			
6	20 Apr	Assignment 1 due by 4pm on Monday 20 April	
	21 Apr	The Normal Distribution, The Central Limit Theorem And Sampling Distributions.	Chapter 8.
7	28 Apr	Sampling Distributions And Inference: Generalities.	Chapter 9.
8	5 May	Test (in class)	
		Inference For One Population.	Chapter 9.
9	12 May	Inference For Two Populations.	Chapter 10.
10	19 May	Inference For Many Populations.	Chapters 11.
11	26 May	Inference For Categorical Data.	Chapter 12.
	29 May	Assignment 2 due by 4pm on Friday 29 May	
12	2 Jun	Inference For Linear Regression Models.	Chapter 13.
