

School of Economics and Finance

FINA 306 FINANCIAL ECONOMICS

Trimester 2, 2015

COURSE OUTLINE

Names and Contact Details

Graeme Guthrie (course coordinator)

Room RH 326

Tel. (04) 463-5763

Email: graeme.guthrie@vuw.ac.nz

Trimester Dates

Teaching Period Monday July 13 – Friday October 16

Study Period Monday October 19 – Thursday October 22

Examination Period Friday October 23 – Saturday November 14 (inclusive)

Withdrawal from Course

1. Your fees will be refunded if you withdraw from this course on or before Friday July 24, 2015.
2. The standard last date for withdrawal from this course is Friday September 25, 2015. After this date, students forced to withdraw by circumstances beyond their control must apply for permission on an 'Application for Associate Dean's Permission to Withdraw Late' form including supporting documentation. The application form is available from either of the Faculty's Student Customer Service Desks or [online](#).

Class Times and Room Numbers

Lectures	Monday, Thursday	09:30-10:20	RHLT3
Tutorials	Monday	11:30-12:20	RWW312
	Monday	12:40-13:30	RWW314

Tutorials are currently scheduled for weeks 2, 4, 5, 7, 8, 10, 12.

Group Work

None

Expected Workload

The workload for FINA 306 is intended to be similar to that for other 300-level ECON and FINA courses. The total expected workload is 150 hours.

Prescription

This course bridges the gap between undergraduate and honours-level study in economics and finance. It reinforces and extends the theoretical basis of decision making as it applies to asset

pricing and corporate finance. It is intended for students who have an interest in pursuing honours-level study in economics and finance at VUW.

Course Learning Objectives

By the end of this course, students should be able to:

1. Derive theoretical models of the determination of asset prices from utility maximizing behavior;
2. Explain and apply economic models of individual choice in a static world with uncertainty;
3. Explain and apply economic models of equilibrium goods and asset markets in a static world;
4. Explain and use economic models of equilibrium of goods and asset markets in a multi-period world; and
5. Explain and analyze the characteristics and implications of incomplete markets.

Course Content

The primary aim of FINA 306 is to bridge the gap between undergraduate and honours-level study in economics and finance. It is intended for students who have an interest in pursuing honours-level study in economics and finance at VUW, which is why the prerequisites include a grade of B or better in ECON 201 (Microeconomics).

The course reflects the philosophy that there is an intimate connection between economics and finance. These subjects use the same tools of analysis and assume the same conceptual basis for individual behaviour and social benefit. In the presence of uncertainty and intertemporal decision-making, economics and finance become virtually one subject.

Compared to the other 300-level papers, there will be a greater focus on underlying theoretical concepts and rather less on problem solving. The course will not be especially mathematically demanding. However, the material will be presented in a way that is much more abstract than many students will have seen before.

Readings

There is no set textbook for this course as comprehensive lecture notes will be available from <http://blackboard.vuw.ac.nz/>.

Materials and Equipment

None.

Assessment

The final grade will be determined by a 75-minute test (contributing 30%), an assignment (contributing 20%), and a two-hour final exam (covering the whole course and contributing 50%).

The test will take place at 6:00pm on Thursday, August 13 in room GBLT4.

The assignment is due 9:30am on Monday, October 5 (start of the first lecture in week 11).

The Assessment Handbook will apply to all VUW courses: see

<http://www.victoria.ac.nz/documents/policy/staff-policy/assessment-handbook.pdf>.

Penalties

Assignments handed in late will not be marked. If a satisfactory medical certificate is provided, the weight from the assignment will be shifted onto the other pieces of assessment; otherwise, the assignment score will be recorded as 0.

Use of Turnitin

Student work provided for assessment in this course may be checked for academic integrity by the electronic search engine <http://www.turnitin.com>. Turnitin is an on-line plagiarism prevention tool which compares submitted work with a very large database of existing material. At the discretion of the Head of School, handwritten work may be copy-typed by the School and submitted to Turnitin. A copy of submitted materials will be retained on behalf of the University for detection of future plagiarism, but access to the full text of submissions will not be made available to any other party.

Examinations

Students who enrol in courses with examinations are obliged to attend an examination at the University at any time during the formal examination period. The final examination for this course will be scheduled at some time during the following period:

Friday October 23 – Saturday November 14 (inclusive)

Mandatory Course Requirements

None.

If you cannot complete an assignment or sit a test or examination, refer to www.victoria.ac.nz/home/study/exams-and-assessments/aegrotat

Class Representative

A class representative will be elected in the first class, and that person's name and contact details made available to VUWSA, the course coordinator and the class. The class representative provides a communication channel to liaise with the course coordinator on behalf of students.

Communication of Additional Information

Course documents and other information will be available on the course website at <http://blackboard.vuw.ac.nz>. Announcements will also be posted there.

Student feedback

Student feedback on University courses may be found at www.cad.vuw.ac.nz/feedback/feedback_display.php

Link to general information

For general information about course-related matters, go to <http://www.victoria.ac.nz/vbs/studenthelp/general-course-information>

Note to Students

Your assessed work may also be used for quality assurance purposes, such as to assess the level of achievement of learning objectives as required for accreditation and academic audit. The findings may be used to inform changes aimed at improving the quality of VBS programmes. All material used for such processes will be treated as confidential, and the outcome will not affect your grade for the course.
