Map of teaching and learning course/class cycle

Step 1: get to know your strength as a teacher (Individuality & passion)

Step 2: get to know the audience (Relate to student experiences & pressures)

Step 3: plan course/class to your strength and relevant to audience (Meticulous planning)

Step 4: invite interaction between students and student - teacher (encourage thinking)

Step 5: provide purpose and make it relevant through examples (link theory with practice)

Step 6: repeat learning through different steps and in multiple ways (simplification and reinforcement)

Step 7: provide feedback loops throughout the course (instant feedback on learning)

Step 8: open line of communication between students and teachers outside the classroom

Step 9: evaluate student feedback and learn from it (Process of self-improvement)
